

John D. McCann, M.D.

Dr. John McCann has limited his practice to facial plastic surgery for 19 years. He is an expert in cosmetic surgery of the eyelids, midface, lower face and forehead. He also offers non-surgical procedures including Botox and fillers. He founded the Club Youthful Me which is a long-term program for achieving & maintaining youthful facial appearances. In addition, he cares for patients with disorders that affect the eyelids, orbit, or tear drainage system.

Dr. McCann is a very experienced surgeon having performed more than 25,000 procedures over the last two decades. He has received numerous accolades including being voted to "Best Doctors in America", and a VIP member of "Who's Who Amongst Physicians". He was featured on national TV in a show titled "Celebrity Beauty Secrets". In a national poll of his peers he was one of only a few surgeons in Utah voted to be in the top 1% of his field. His peers voted him to be the Chairman of his department at Intermountain Medical Center and Salt Lake Regional Medical Center.

He is a world renowned teacher and doctors from around the world travel to learn about surgeries he has developed. Dr. McCann is one of only 50 surgeons to be granted a certified fellowship training program in his field. In recent years he has been honored as the keynote speaker for numerous major international meetings in the United States, Europe, Asia, South America, and Brazil. He has published over 100 scientific papers and chapters and has been the executive editor of an important journal in his field. He is also a member of the Botox national training faculty and has taught many physicians in the region Botox and filler injection techniques.

Dr. McCann's excellent reputation has been earned one patient at a time. In your meeting with Dr. McCann you are likely to find him to be down to earth, an excellent listener, friendly, sometimes humorous, and always very good at communicating to you the best approach to solving your problems. Dr. McCann was born in Iowa and is a graduate of the University of Iowa, where he completed medical school & received a PhD in biophysics & physiology. His PhD thesis was the first to describe the cause of the most common lethal genetic disease of those of European descent, Cystic Fibrosis. Dr. McCann completed surgery training at the prestigious University of California, San Francisco. He did advanced training in eyelid & facial plastic surgery at the University of Utah. After completing his training in Utah, he took a position on the full-time faculty at UCLA. During 9 years on the full time faculty at UCLA, Dr. McCann was the head of his department at a UCLA affiliated hospital, the founder & director of the Aesthetic Center at UCLA & the co-director of the orbital disease center at UCLA. After achieving tenure at UCLA he retired from the university to become the medical director of The Center for Facial Appearances. He has worked at the office in Sandy, Utah for 8 years.

Outside of work Dr. McCann is inseparable from his wife Rachel. They both enjoy traveling as well as outdoor activities such as fly fishing and white water rafting.
